

INSULATION PIN

Application

Suitable for air conditioning duct work or duct lining work location. In order to be fixed with Master Lock, the surface area has to be clean and free from oil. This can be cleaned by the cloth supplied in the carton, then remove the released paper from the base and fix it to the desired location, press it firmly for a while to allow adhesive be fully adhered to the location area. After that insulation and washer will be installed in the normal way.

Limited Surface Area

Suitable for metal surface e.g. galvanized steel, aluminium stainless steel, Etc. it is unsuitable for rough or surface like concrete surface. These areas must use Master Pin instead.

DESCRIPTION	UNIT	TEST METHOD
Tape thickness	0.013 mm.	Measurement
Adhesion	9.9 (N/cm)	ASTM D3330 - 90 degree
Shear Strength (0.5 inch ²)	1,000 grams at 22 C 500 grams at 70 C	ASTM D3654
Service Temperature	121 C (250F) For Long Term Operation 149 C (300F) For Short Term Operation
