

PURATHANE PUR FOAM

Polyurethane Foam is a rigid urethane foam produced on a custom built discontinuous process, imparting dimensional stability and consistent quality to the finished blocks. The versatility of this manufacturing process allows special sized blocks and sheets to be produced offering users the widest possible choice of applications and uses

Applications :

-has many diverse applications especially within the Oil & Gas, Petrochemical, Cryogenic Industries, Refrigeration and General Insulation Industries. It is used for Pipe, Vessel and Tank Insulation in the process plants and insulation of Food industries.
